HUMS 218 CoOccurring Disorders

Presentation

Each student will prepare a 10 minute PowerPoint presentation. The presentation should analyze one substance disorder, one mental health disorder, one medical condition, and the link between them. The medical condition can either have a link to the substance disorder or the mental health disorder, or both but does not have to link to both (substance and mental health disorders). The presentation needs to address information from the DSM-V. The presentation should contain at least one element regarding trauma/domestic violence. In addition, the student must incorporate how they would use at least 2 of the handouts/exercises from the textbook with his/her clients with co-occurring disorders. The PowerPoint font should be no smaller than 26 pt., be laid out in professional manner, and a minimum of 10 references should be including in the last slides of the PowerPoint. In addition to the assignment being placed in the Dropbox in D2L by 6pm on the due date, he/she MUST bring the presentation on a thumb drive to be able to present the presentation to the class.
